

Jan 14, 2021, version 1.3 beta

- Solved a problem, some aircraft codes (> 4 characters) were not fixed.
- Added a few fixes for the AIGAIM program to the fixes.xml file.
- Added checks to ensure that fixes in fixes.xml are valid.

Jan 13, 2021, version 1.2 beta

- The aircraft type fixes of old chapter 7 are now put in the file **data/fixes.xml**, so you will be able to edit and or add fixes.

Jan 5, 2021, version 1.1 beta

- Added IVAO_MTL recognition.
- An empty icao_airline key or icao_airline="ZZZZ" will get the new generic code ZZZ.

=> Note that you have to use **PSXT_MSFS 1.1beta+** to recognise this generic ZZZ code.

Nov 27, 2020, version 1.0 beta

- First special release for MSFS, functionally equal to AILGenerator 8.3.
