Although still far from perfect here are the steps to be taken (in this order) to let PSXseeconTraffic generate real live traffic in Microsoft Flight Simulator 2020:

1. [Download liveries-megapack](#) and install these aircraft in your MSFS **Community** folder.  
*(as an interim solution until good real AI aircraft packages become available for MSFS!)*

2. Download and install [PSXT\\_MSFS version 27.0+](#).

Run **PSXT\_MSFS.exe** from the PSXT\_MSFS folder. Preferably start it by double clicking **Start\_PSXT\_MSFS.bat**

*It will first scan your Official and Community folders to detect your ai aircraft and airports, this may take up to 5 minutes.*
